## VISION UPS Systems S. à r. l.

### About VISION UPS

VISION UPS SYSTEMS S. a. r. l. was set up in 2003 in Luxemburg by Belgian specialists in the UPS and in systems of direct current, Patrick Willem and Ralph Collas, who have 20 years experience in this sphere. This brand took hold on four continents in a short space of time, and that is the reason, why VISION UPS is worldwide recognized today. The equipment of VISION has proved its quality not only in Europe, but in hard conditions of Africa and Asia, too. Since 2008/2009 the right measures were taken, such as saving of a big storehouse in Luxemburg for delivery "faster than the all", the world economic crisis even caused the ramping up of the VISION UPS production. At the same time VISION was spread to the East: 2009 OOO VISION UPS RUSSIA was set up with its own storehouse in Moscow. The OOO in Moscow represents VISION UPS in all the CIS.

We are notable for:

- \* **European quality for fair price**
- \* **delivery in a short term**
- \* **custom-made products**
- \* **a wide range of products` groups**
- \* **unique and interesting positions**

## Service and Warranty

### **Service and Warranty** Optimal service in all stages

The philosophy of VISION attends to a long-term joint operation in service and technical support. It means exactly:

#### **Training**

VISION offers its customers free courses, where managers or technicians can get to know all details of production.

#### **Designing**

In common with its clients VISION develops custom elaborations, which have a lot of modifications and individual configurations due to their great flexibility.

#### **Installation and maintenance**

VISION offers – in addition to standard instructions - the specified technical documentation for installation and maintenance its devices, what makes it possible for technicians to save time on-site and minimize the source of error. Besides, the specialists of VISION are always disposable for fast consultations.

#### **During and after the term of warranty**

VISION considers to be responsible for an uninterpretable functioning of its devices during and after the term of warranty. That is why we offer technical support at any time. Rapid and effective problem solving from VISION per E-mail, Skype, ICQ, phone is appreciated in all over the world – first of all in the regions, which are far from the big populated areas.

#### **Warranty**

- Line Interactive UPS: 2 years
- On-line UPS (1/1): 2 years
- On-line UPS (3/1 & 3/3): 1 year
- Converters AC-DC and DC-AC: 2 years
- Stabilizers: 2 years
- Batteries (in all lines): 1 year

Replacement of batteries: the availability of commodities in our storehouse makes it possible for us to replace the battery in a short time for all types of UPS, chargers, inverters and stabilizers.
